Professional Summary

Full Stack Developer with hands-on experience building and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and RESTful APIs. Skilled in Generative AI application development using LangChain, Retrieval-Augmented Generation (RAG), LLM APIs (OpenAI, Gemini), vector databases and AI agents. Experienced with DevOps and cloud infrastructure including Docker, Kubernetes, AWS (EC2, S3), CI/CD pipelines and Nginx. Strong foundation in Data Structures and Algorithms, OOP, DBMS, Operating Systems and Computer Networks, with a track record of delivering production-ready software independently end to end.

Technical Skills

Programming Languages: JavaScript (ES6+), Python, C++, SQL

Frontend Development: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Three.js, GSAP, Responsive Web Design

Backend Development: Node.js, Express.js, REST API Design, Socket.IO, WebSockets, JWT Authentication, OAuth 2.0, Microservices Architecture

Databases: MongoDB, Mongoose, MySQL, Redis, Pinecone (Vector Database)

Generative AI & LLMs: LangChain, OpenAI API, Google Gemini API, Retrieval-Augmented Generation (RAG), LLM Integration, AI Agents, Vector Databases, Prompt Engineering, Embeddings

DevOps, Cloud & Tools: Docker, Kubernetes, AWS EC2, AWS S3, CI/CD, GitHub Actions, Nginx, Linux, Git, GitHub, Postman, Vercel, Render

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, System Design Basics

Experience

Full Stack Developer

Jan 2025 – Present

Independent Projects

Remote

- Engineered 4+ production-ready full stack applications using the MERN stack, Generative AI tooling and DevOps technologies, covering the complete software development lifecycle.
- Designed and built 15+ REST API endpoints with JWT authentication, OAuth 2.0 integration and optimized MongoDB database operations, improving response efficiency.
- Integrated 3+ end-to-end AI workflows using LangChain and LLM APIs, automating manual processing tasks and reducing turnaround time by 60%; containerized and deployed applications using Docker, Kubernetes and CI/CD pipelines via GitHub Actions.

Projects

OMNI – AI Chat Assistant Platform

MERN, LangChain, Gemini API

Live: omni-nu.vercel.app | GitHub: github.com/Rahul-Singh2507/Omni

- Engineered a ChatGPT-like AI chat assistant using the MERN stack, LangChain, Google Gemini API and Large Language Models (LLMs).
- Integrated Retrieval-Augmented Generation (RAG) workflows with persistent MongoDB chat storage and real-time AI conversation handling.
- Built 10+ REST API endpoints for user authentication, chat management and AI response generation.

AI Resume Analyzer

React, Node.js, AI/LLM

Live: resume-analyzer-blush-iota.vercel.app | GitHub: github.com/Rahul-Singh2507/Resume-analyzer

- Built an AI-powered ATS resume analyzer that scores resumes and generates actionable improvement recommendations.
- Integrated resume parsing, job description matching and AI feedback generation using LLM APIs.
- Developed backend services supporting resume upload, parsing, analysis and scoring workflows.

Snitch – Clothing E-Commerce Platform

MERN, Redux Toolkit

GitHub: github.com/Rahul-Singh2507/Snitch

- Developed a full-featured clothing e-commerce platform using MongoDB, Express.js, React.js and Node.js.
- Implemented product catalog management, shopping cart functionality, user authentication and a complete checkout workflow.
- Optimized frontend state management and performance using Redux Toolkit.

Microservice Deployment Platform

Node.js, Docker, Kubernetes

GitHub: github.com/Rahul-Singh2507/micro-service-project

- Architected a scalable microservice backend using Node.js, Express.js, Docker and Kubernetes.
- Configured Kubernetes Services, Secrets, RBAC policies, Nginx reverse-proxy routing and container orchestration.
- Automated the deployment workflow using CI/CD principles and GitHub Actions.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

M.I.E.T, Kumaon University

CGPA: 7.0 / 10

Achievements

- Solved 150+ Data Structures and Algorithms problems across online judges and coding platforms.
- Built and deployed 5+ production MERN, Generative AI and DevOps based projects independently.

Soft Skills

Problem Solving | Team Collaboration | Communication | Adaptability | Debugging | Time Management | Continuous Learning
